All questions shall be furnished in writing via email to:

Justin Lockwood [jlockwood@crossland.com](mailto:jlockwood@crossland.com) & Nathan Burris [nburris@crossland.com](mailto:nburris@crossland.com)

## **Trade Package Summaries**

### **City of Norman – Norman Senior Center**

#### **BID PACKAGE #03**

**BID DATE: April 12<sup>th</sup> at 2:00 PM**

**Bid Location:**

**201 W. Gray, Norman, OK 73069 – Communications Conference Room**

The following Contract (Bid Group) Work Summaries describe the intended scopes of work to be included in each Bid Package quoted under the Crossland Construction Co., Inc. Construction Management Contract. Bids shall include all the requirements of the plans with specifications unless specifically indicated otherwise in this summary. This includes all layout and daily clean up involved with your work. It is the bidder's responsibility to review bidding requirements and forms to insure a complete, safe, and coordinated execution of the Work Package being quoted. Additionally, bidders shall include in their pricing applicable portions of related specification sections normally associated with the work to be performed whether specifically indicated by this Contract Work Summary or not. Should any bidder be unclear as to the scope of work required, he is instructed to contact the Construction Manager for resolution prior to bidding. In the absence of written instruction to the contrary, in matters of specification and/or scope of interpretation, bidders shall include the more costly and complete of the possible interpretations. Awarding of Trade Contracts will be based on best qualified bid. A copy of the contract agreement to be issued to the lowest qualified trade contractor is available for review upon request.

The trade contractor who is awarded this work shall be responsible for attaining and paying for his own plans & specifications and shall include those costs in the bid amount.

Substitution requests must be submitted for review and consideration at least 7 days prior to the bid date. Substitution requests submitted after this time will not be accepted or considered.

Requests for information must be submitted for review 3 days prior to the bid date. RFI's submitted after this date will not be answered.

**How to submit and what to include in your sealed bid:**

1. The Sealed Bid Envelope to be addressed and filled out as outlined on page 1.
2. Write in your bid amounts on the Bid Form
3. Include in your sealed envelope a bid bond, cashier's check, or certified check for 5% of your bid if over \$50,000.
4. Include costs for payment and performance bonds in your bid amount if your total bids exceed \$50,000.
5. Sign and complete all information and include attachments A, B, C, D, E, F & G in your sealed envelope. Make sure you identify receipt of all addenda on attachment A.
6. Items #1 - #5 above to be included in your sealed bid and hand delivered to the location identified on page 1 before 2:00 PM December 2<sup>nd</sup>.

## **TRADE CONTRACT**

### **4A Masonry**

**Work including but not limited to the following:**

**Drawings and Specifications:** See Attached List of Drawings/Specifications

**Project Specific Inclusions:** *Line items listed below are specific to this project and general in nature. All costs associated shall be included within the base bid for this trade contract. Scopes listed shall be priced in their entirety (inclusive of all labor, material, means of conveyance, supervision, and equipment) for a complete and finished system per the contract documents.*

- 1) Provide and install all CMU, reinforcing for cmu, bond beams, bond beam control joints including gasketing, control joints for cmu, temp bracing, reinforcement at cmu openings, cmu lintels and bull nose CMU.
- 2) Set and grout hollow metal frames in CMU walls.
- 3) Include masonry dumpster enclosure screen walls
- 4) Include stone and cast stone at monument sign.

**General Trade Inclusions:** *Line items listed below are typical or boilerplate in nature and shall be included in the base bid IF supported and required by the contract documents unless noted otherwise.*

- 1) Provide and install all masonry units as listed on the project including, but not limited to, CMU, Brick Veneer, Cast Stone, split-faced, burnished block, glass block, ribbed block, special shaped blocks, utility brick, textured block, and ground faced block.
- 2) Furnish and install all masonry reinforcements, rebar, joint reinforcements, bracing and anchorages. Bracing design to be in accordance with manufacturers best practices.
- 3) Trade Contractor shall provide shop drawings, if required, showing details of work not adequately detailed on the construction drawings.
- 4) Trade Contractor is responsible for all mortar, grout, colored mortar, and grout fill. Trade Contractor to comply with all requirements of the specifications.
- 5) Trade Contractor to supply and install any and all associated flashings relative to this scope or integral to the work of this trade contract as specified in the Sheet Metal Flashings and Trim spec section.
- 6) Trade Contractor shall include installation of lintels and loose lintels provided by others.
- 7) Trade Contractor shall include the setting and proper bracing of hollow metal door frames, windows, or opening/cased frames within Masonry. Construction Manager must approve any dimpling of frames.
- 8) All ties, anchorages, weeps and vents, control joints, drainage fabric, integral water repellents, bracing, fasteners, and other masonry accessories.
- 9) All rigid insulation associated with the masonry scope of work.
- 10) Include application of brick sealers, as it relates to this scope of work.
- 11) Install all miscellaneous metals associated with the masonry application. Layout, install, grout, and place all bearing plates, lintels, brick relief angles, and other embeds into work.
- 12) This scope is inclusive of all masonry on the project. Should there be masonry applications at locations other than the main building or main scope of work, it will be this Trade Contract's responsibility (I.e., monument signs, dumpster enclosures etc.)
- 13) Provide and install any concrete splash blocks associated with the project.
- 14) Trade Contractor to furnish and install all expansion joints and expansion joint cover assemblies in masonry work as necessary.
- 15) Washing procedures, methods, and timing must be approved by the Construction Manager prior to commencing work. Approval may also be necessary by from the architect. Testing of grout and mortar is paid for by this Trade Contractor, if necessary, or required. Soap masonry units around all structure and as required by Construction Manager. and/or Contract Documents.

Norman Senior Center – Bid Package #3 – Site and Building

- 16) Daily cleanup, removal of all trash, debris, and excess materials to dumpster (dumpster by Construction Manager). Mason must remove all bulk waste, e.g., block, brick, sand, etc. from the site. Trade Contractor is responsible to supply, install, and maintain all barricades necessary for openings associated with this scope of work.
- 17) Trade Contractor shall provide any hot and cold weather protection required by the Work provided under this Trade Contract, the project schedule, or as directed by Construction Manager. Also include covering up of open walls for protection of rain and washout, or heating of mortar, if cold weather requirements deem necessary. Weather Protection of stored materials and finished work to be included in this trade contract as well as protection of all windows, frames, and all surroundings.
- 18) All layout, staking, grades and elevations as required by the work provided by this Trade Contract, including embeds (all anchors).
- 19) Provide all rubbing, tuck-pointing, and cleanup. All masonry shall be rubbed, pointed, and cleaned immediately after construction of the wall is completed or as directed by Construction Manager.
- 20) Pre-Installation meeting is required, with mandatory attendance by subcontractor's field, and office personnel.
- 21) Detailed coordination with window installations is a requirement of this Trade Contract.
- 22) Construct and dry pack and grout all joist pockets.
- 23) Cleanup of all waste and excess materials from inside chases. Protect mechanical and electrical piping, boxes, carriers, and fixtures.
- 24) Coordination of hose bibs, exterior receptacles, FDC's, Knox boxes, Fire Alarm, Security Cameras, and any other items by other trades to be installed in the masonry work to be coordinated by this Trade.
- 25) Clean and prep footings (as required) prior to start of masonry work.
- 26) This Trade Contract includes all items of work covered by the specifications be they named, inferred, or normally performed by members of Trade Contractor's industry. For purposes of clarification, we may list items to be included in addition to those which are covered in the plans and specifications.
- 27) This Trade Contract is intended to be all inclusive of labor and equipment required for the scope of work
- 28) All work shall be accomplished using accepted methods and procedures of the highest recognized standards and shall be done in a neat and workmanlike manner, in accordance with applicable standards and codes and the requirements of the prime contract.
- 29) All work included in this trade contract shall be according to the project/progress schedule provided by the construction manager. This includes day and night work as required by project schedule. If the Subcontractor falls behind schedule in the submittal portion or the installation portion of this Subcontract through no fault of the Contractor or the Owner, the Subcontractor shall work overtime or perform shift work at no extra cost to Contractor as necessary to maintain the project schedule.
- 30) Trade Contractor shall understand when their scope of work is to be put in place and include all weather protective means as required.
- 31) Coordination and phasing of work as required by Crossland Construction Co.
- 32) Include all ADA requirements applicable to system(s) and project.
- 33) Furnish, receive, offload, store, stage, inventory, and protect all materials from weather damage and/or mud. The Trade Contractor shall be responsible to correct any material damaged or muddled.
- 34) Include travel and mobilizations for field measuring.
- 35) Any damage, as a result of this Trade Contractor's work to adjacent existing structures, finishes, equipment or other tangible aspect of the project and repair, thereof, will be the responsibility of this Trade Contractor.
- 36) Trade Contractor to include daily cleanup of work. Temp labor will be provided at the Trade Contractor's expense if failure to provide daily cleanup is evident, but not before written notice to correct is given to Trade Contractor by Crossland Construction.
- 37) Trade Contractor shall include a final clean of all materials installed by this contract.
- 38) This Trade Contractor shall clean and repair any damages, due to work provided in this contract, to the streets or adjacent areas.
- 39) Trade Contractor is responsible for any track out created by employees, subcontractors, or vendors of said Trade Contractor.
- 40) Trade Contractor shall include any dewatering as necessary to perform scope of work.

Norman Senior Center – Bid Package #3 – Site and Building

- 41) Trade Contractor to include a minimum 40-hr work week. This shall mean work, put in place, by the Trade Contractor and not inclusive of travel time.
- 42) Trade Contractor to include any and all permits applicable to scope of work, including IDP, as required by the contract documents, or, as required by authorities having jurisdiction inclusive of any fees.
- 43) Trade Contractor to include coordination of testing. Testing to be paid by others, however, costs of a re-test due to failure of the Trade Contractor, shall be paid by the Trade Contractor.
- 44) Trade Contractor to include all applicable submittals and submittal requirements as identified and required by the contract documents including, but not limited to, mockups, samples, product data, shop drawings, calculations, certifications, delegated design, engineering, stamps, warranties etc.

**Exclusions:**

**Sales Tax**

## **TRADE CONTRACT**

### **5B Steel & Miscellaneous Metals**

**Work including but not limited to the following:**

**Drawings and Specifications:** See Attached List of Drawings/Specifications

**Project Specific Inclusions:** *Line items listed below are specific to this project and general in nature. All costs associated shall be included within the base bid for this trade contract. Scopes listed shall be priced in their entirety (inclusive of all labor, material, means of conveyance, supervision, and equipment) for a complete and finished system per the contract documents.*

- 1) Supply and install dumpster gates, roof ladders, safety posts and roof guard rails.

**General Trade Inclusions:** *Line items listed below are typical or boilerplate in nature and shall be included in the base bid IF supported and required by the contract documents unless noted otherwise.*

- 1) Trade Contractor shall furnish and install all specialty metal fabrications and railings (stainless steel/bronze/aluminum/brass) and custom metal fabrications, including but not limited to, brackets, accessories, aluminum ladders, embeds or sleeves required for installation for a complete system.
- 2) Include all finishes as identified, and as required for a complete system.
- 3) Work shall be true and level. Trade Contractor is to comply with all quality assurance requirements, including but not limited to structural performance, thermal movements, corrosion control and delegated design requirements. Non-conforming work shall be repaired at no cost to the Construction Manager or the Owner.
- 4) Provide and install all railing infill panels including, but not limited to, woven aluminum wire mesh panels, resin panels, glass panels, aluminum panels, 3m panels, sheet metal panels, perforated metal or others as identified.
- 5) Include all ADA requirements applicable to the system and project.
- 6) Verify actual locations of walls and other construction contiguous with metal fabrications by field measurements before fabrication and indicate measurements on shop drawings.
- 7) Include any additional supports required by the system but not shown on the drawings.
- 8) Include all structural balusters as shown on the drawings.
- 9) Include all installation including mounting/attachment of all posts. Include coring or pre-set sleeves.
- 10) Include all brackets, flanges, anchors, tubing, pipe, castings, glazing materials, glazing gaskets, fasteners, and miscellaneous materials necessary for a complete railing system.
- 11) Furnish and install materials to be embedded in concrete. Coordinate the installation in formwork with the concrete contractor. Be present to observe concrete pours and protect the material as specified prior to concrete pour. Cover material as necessary to prevent concrete splatters or discoloration due to concrete pour and remove protection materials after completed of pour. Should embeds be required to be embedded in concrete, provide embeds in the same metal alloy as the railing system to prevent dissimilar metals. Provide labor to layout and fully install embeds.
- 12) If required, include the costs of all concrete coring for a complete installation. Include the cleanup of any slurry created by drilling operations and protection of adjacent materials from slurry and drilling operations.
- 13) Coordinate backing requirements with Construction Manager.
- 14) This Trade Contract is intended to be all inclusive of labor and equipment required for the scope of work.
- 15) This Trade Contract includes all items of work covered by the specifications be they named, inferred, or normally performed by members of Trade Contractor's industry. For purposes of clarification, we may list items to be included in addition to those which are covered in the plans and specifications.

Norman Senior Center – Bid Package #3 – Site and Building

- 16) The Trade Contractor acknowledges and agrees that any recapitulation of the work to be performed shall be for the sole and exclusive purpose of clarifying the status of those items which are included in the Trade Contractor's scope of work. Items not specifically mentioned but are normally performed by members of the Trade's industry are included as part of the Trade Contractor's Scope of Work.
- 17) All work shall be accomplished using accepted methods and procedures of the highest recognized standards and shall be done in a neat and workmanlike manner, in accordance with applicable standards and codes and the requirements of the prime contract.
- 18) All work included in this trade contract shall be according to the project/progress schedule provided by the construction manager. This includes day and night work as required by project schedule. If the Subcontractor falls behind schedule in the submittal portion or the installation portion of this Subcontract through no fault of the Contractor or the Owner, the Subcontractor shall work overtime or perform shift work at no extra cost to Contractor as necessary to maintain the project schedule.
- 19) Trade Contractor shall understand when their scope of work is to be put in place and include all weather protective means as required.
- 20) Coordination and phasing of work as required by Crossland Construction Co.
- 21) Include all ADA requirements applicable to system(s) and project.
- 22) Furnish, receive, offload, store, stage, inventory, and protect all materials from weather damage and/or mud. The Trade Contractor shall be responsible to correct any material damaged or muddied.
- 23) Include travel and mobilizations for field measuring.
- 24) Any damage, as a result of this Trade Contractor's work to adjacent existing structures, finishes, equipment or other tangible aspect of the project and repair, thereof, will be the responsibility of this Trade Contractor.
- 25) Trade Contractor to include daily cleanup of work. Temp labor will be provided at the Trade Contractor's expense if failure to provide daily cleanup is evident, but not before written notice to correct is given to Trade Contractor by Crossland Construction.
- 26) Trade Contractor shall include a final clean of all materials installed by this contract.
- 27) This Trade Contractor shall clean and repair any damages, due to work provided in this contract, to the streets or adjacent areas.
- 28) Trade Contractor is responsible for any track out created by employees, subcontractors, or vendors of said Trade Contractor.
- 29) Trade Contractor shall include any dewatering as necessary to perform scope of work.
- 30) Trade Contractor to include a minimum 40-hr work week. This shall mean work, put in place, by the Trade Contractor and not inclusive of travel time.
- 31) Trade Contractor to include any and all permits applicable to scope of work, including IDP, as required by the contract documents, or, as required by authorities having jurisdiction inclusive of any fees.
- 32) Trade Contractor to include coordination of testing. Testing to be paid by others, however, costs of a re-test due to failure of the Trade Contractor, shall be paid by the Trade Contractor.
- 33) Trade Contractor to include all applicable submittals and submittal requirements as identified and required by the contract documents including, but not limited to, mockups, samples, product data, shop drawings, calculations, certifications, delegated design, engineering, stamps, warranties etc.

Items not specifically mentioned but are normally performed by members of the Trade's industry are included as part of the Trade Contractor's Scope of Work.
- 5) All work shall be accomplished using accepted methods and procedures of the highest recognized standards and shall be done in a neat and workmanlike manner, in accordance with applicable standards and codes and the requirements of the prime contract.
- 6) All work included in this trade contract shall be according to the project/progress schedule provided by the construction manager. This includes day and night work as required by project schedule. If the Subcontractor falls behind schedule in the submittal portion or the installation portion of this Subcontract through no fault of the Contractor or the Owner, the Subcontractor shall work overtime or perform shift work at no extra cost to Contractor as necessary to maintain the project schedule.
- 7) Trade Contractor shall understand when their scope of work is to be put in place and include all weather protective means as required.
- 8) Coordination and phasing of work as required by Crossland Construction Co.
- 9) Include all ADA requirements applicable to system(s) and project.
- 10) Furnish, receive, offload, store, stage, inventory, and, protect all materials from weather damage and/or mud. The Trade Contractor shall be responsible to correct any material damaged or muddled.
- 11) Include travel and mobilizations for field measuring.
- 12) Any damage, as a result of this Trade Contractor's work to adjacent existing structures, finishes, equipment or other tangible aspect of the project and repair, thereof, will be the responsibility of this Trade Contractor.
- 13) Trade Contractor to include daily cleanup of work. Temp labor will be provided at the Trade Contractor's expense if failure to provide daily cleanup is evident, but not before written notice to correct is given to Trade Contractor by Crossland Construction.
- 14) Trade Contractor shall include a final clean of all materials installed by this contract.

Norman Senior Center – Bid Package #3 – Site and Building

- 15) This Trade Contractor shall clean and repair any damages, due to work provided in this contract, to the streets or adjacent areas.
- 16) Trade Contractor is responsible for any track out created by employees, subcontractors, or vendors of said Trade Contractor.
- 17) Trade Contractor shall include any dewatering as necessary to perform scope of work.
- 18) Trade Contractor to include a minimum 40-hr work week. This shall mean work, put in place, by the Trade Contractor and not inclusive of travel time.
- 19) Trade Contractor to include any and all permits applicable to scope of work, including IDP, as required by the contract documents, or, as required by authorities having jurisdiction inclusive of any fees.
- 20) Trade Contractor to include coordination of testing. Testing to be paid by others, however, costs of a re-test due to failure of the Trade Contractor, shall be paid by the Trade Contractor.
- 21) Trade Contractor to include all applicable submittals and submittal requirements as identified and required by the contract documents including, but not limited to; mockups, samples, product data, shop drawings, calculations, certifications, delegated design, engineering, stamps, warranties etc.

**Exclusions:**

Sales Tax

## **TRADE CONTRACT**

### **12A Window Treatments**

**Work including but not limited to the following:**

**Drawings and Specifications:** See Attached List of Drawings/Specifications

**Project Specific Inclusions:** *Line items listed below are specific to this project and general in nature. All costs associated shall be included within the base bid for this trade contract. Scopes listed shall be priced in their entirety (inclusive of all labor, material, means of conveyance, supervision and equipment) for a complete and finished system per the contract documents.*

- 1) Roller shades
- 2) Motorized Shades

**General Trade Inclusions:** *Line items listed below are typical or boilerplate in nature and shall be included in the base bid IF supported and required by the contract documents unless noted otherwise.*

- 1) Trade Contractor shall include all labor, material and equipment to install all roller window shades as shown in the contract documents.
- 2) Include all bead chains, rollers, fascia, fabric, hardware, closure panel, wall clips, side channels, and associated accessories for complete installation.
- 3) Include all roller window shades, brackets, fabrics, bottom bars, end caps and all components and accessories.
- 4) Include site visits as necessary for field dimensioning.
- 5) It is the responsibility of this Trade Contractor to maintain a clean and safe working environment in accordance with applicable codes.
- 6) This Trade Contract is intended to be all inclusive of labor and equipment required for the scope of work.
- 7) This Trade Contract includes all items of work covered by the specifications be they named, inferred or normally performed by members of Trade Contractor's industry. For purposes of clarification, we may list items to be included in addition to those which are covered in the plans and specifications.
- 8) The Trade Contractor acknowledges and agrees that any recapitulation of the work to be performed shall be for the sole and exclusive purpose of clarifying the status of those items which are included in the Trade Contractor's scope of work. Items not specifically mentioned but are normally performed by members of the Trade's industry are included as part of the Trade Contractor's Scope of Work.
- 9) All work shall be accomplished using accepted methods and procedures of the highest recognized standards and shall be done in a neat and workmanlike manner, in accordance with applicable standards and codes and the requirements of the prime contract.
- 10) All work included in this trade contract shall be according to the project/progress schedule provided by the construction manager. This includes day and night work as required by project schedule. If the Subcontractor falls behind schedule in the submittal portion or the installation portion of this Subcontract through no fault of the Contractor or the Owner, the Subcontractor shall work overtime or perform shift work at no extra cost to Contractor as necessary to maintain the project schedule.
- 11) Trade Contractor shall understand when their scope of work is to be put in place and include all weather protective means as required.
- 12) Coordination and phasing of work as required by Crossland Construction Co.
- 13) Include all ADA requirements applicable to system(s) and project.
- 14) Furnish, receive, offload, store, stage, inventory, and, protect all materials from weather damage and/or mud. The Trade Contractor shall be responsible to correct any material damaged or muddied.
- 15) Include travel and mobilizations for field measuring.

Norman Senior Center – Bid Package #3 – Site and Building

- 16) Any damage, as a result of this Trade Contractor's work to adjacent existing structures, finishes, equipment or other tangible aspect of the project and repair, thereof, will be the responsibility of this Trade Contractor.
- 17) Trade Contractor to include daily cleanup of work. Temp labor will be provided at the Trade Contractor's expense if failure to provide daily cleanup is evident, but not before written notice to correct is given to Trade Contractor by Crossland Construction.
- 18) Trade Contractor shall include a final clean of all materials installed by this contract.
- 19) This Trade Contractor shall clean and repair any damages, due to work provided in this contract, to the streets or adjacent areas.
- 20) Trade Contractor is responsible for any track out created by employees, subcontractors, or vendors of said Trade Contractor.
- 21) Trade Contractor shall include any dewatering as necessary to perform scope of work.
- 22) Trade Contractor to include a minimum 40-hr work week. This shall mean work, put in place, by the Trade Contractor and not inclusive of travel time.
- 23) Trade Contractor to include any and all permits applicable to scope of work, including IDP, as required by the contract documents, or, as required by authorities having jurisdiction inclusive of any fees.
- 24) Trade Contractor to include coordination of testing. Testing to be paid by others, however, costs of a re-test due to failure of the Trade Contractor, shall be paid by the Trade Contractor.
- 25) Trade Contractor to include all applicable submittals and submittal requirements as identified and required by the contract documents including, but not limited to; mockups, samples, product data, shop drawings, calculations, certifications, delegated design, engineering, stamps, warranties etc.

**Exclusions:**

- 1) Sales Tax

**Alternate No. 7:** Multipurpose Gymnasium Addition.

**Base Bid:** No Multipurpose Gymnasium Building Addition.

**Alternate:** Bid trade scope above for the Multipurpose Gymnasium Building addition as indicated on the Alternate-07 Drawings.

## **22A Plumbing**

**Work including but not limited to the following:**

**Drawings and Specifications:** See Attached List of Drawings/Specifications

**Project Specific Inclusions:** *Line items listed below are specific to this project and general in nature. All costs associated shall be included within the base bid for this trade contract. Scopes listed shall be priced in their entirety (inclusive of all labor, material, means of conveyance, supervision, and equipment) for a complete and finished system per the contract documents.*

- 1) Includes all necessary piping, fixtures, valves, pumps, drains, plaster traps, cleanouts, mop sinks, wall hydrants, roof hydrants, and insulation for a complete plumbing system.
- 2) Includes all water, sanitary sewer, vent, condensate, roof drain and gas piping.
- 3) Includes all water heaters.
- 4) Includes all sump pumps.
- 5) Includes all showers and accessories.
- 6) Include final connection of food service equipment. Installation by others.
- 7) Includes all necessary fire caulking / fire proofing directly related to this scope of work.
- 8) Include the supply of all access panels that are required as part of the scope of work; installation of access panels is by others.
- 9) Coordinate elevation of floor drains and trench drains with adjacent finishes for proper drainage.
- 10) Include all specialty piping and hangers required in natatorium and pool equipment areas.
- 11) Include high density foam at penetrations in natatorium for this scope of work.
- 12) Include submission of coordination drawings with shop drawings / submittals.
- 13) Provide and install grease trap, cleanouts and sampling port. Coordinate cleanouts and sampling port with finish grades.
- 14) All utilities will be installed with 5' of building. This trade contract to tie-in from this point. Including but not limited to, water, gas, sanitary and roof drainage/storm.
- 15) Provide an install concrete collars around cleanouts that are not in sidewalk or paving.

**General Trade Inclusions:** *Line items listed below are typical or boilerplate in nature and shall be included in the base bid IF supported and required by the contract documents unless noted otherwise.*

- 1) Trade Contractor to provide all labor, material and equipment to furnish and install all plumbing fixtures, plumbing specialties, water piping, water treatments, sanitary waste, vent piping, roof drainage piping, natural gas piping, water heaters, mechanical identification, recirculating pumps, grease interceptors, floor and roof drains, solids interceptors, piping, pipe expansion fittings and loops, supports, equipment, roof drain piping and underground piping to existing storm system, insulation, under-slab drainage required for complete, operational, and finished plumbing systems.
- 2) Trade Contractor to include all piping, fittings, sleeves, valves, escutcheons, expansion joints, framing systems, hanger shield inserts, pipe stands, pipe positioning systems, equipment supports, alignment guides, fasteners, hangers, supports and all associated structural steel and grout alignment guides for this scope of work.

Norman Senior Center – Bid Package #3 – Site and Building

- 3) Trade Contractor shall include all electric and fuel fired water heaters, drain pans, piping, regulators, expansion tanks, shock absorbers, venting, supports, anchors, burners, shut off valves and all components and accessories.
- 4) Trade Contractor to furnish and install all fixtures, water closets, urinals, lavatories, sinks, electrical water coolers, service sinks, mop basins, drinking fountains, showers, bathtubs, washer boxes, emergency eye wash stations, recirculating pumps, electric water coolers, water heaters, faucets, flushometers, toilet seats, protective shielding guards, fixture supports, emergency showers and all associated components and accessories.
- 5) Trade Contractor shall include all design work associated for a complete, finished, and operational system. System to be designed to meet all local, state, and national codes as well as the requirements set forth in the contract documents.
- 6) Trade Contractor to include all condensate piping, meters, gages, thermometers, test plugs and thermowells.
- 7) Include all identification, equipment labels, warning signs, pipe labels, direction arrows, stencils, valve tags and warning tags.
- 8) Include all insulation including foam insulation, cellular glass, flexible elastomeric, mineral fiber, cements, adhesives, mastics, joint sealants, jackets, fabric reinforced mesh, field applied jackets, tapes, securements, and corner angles.
- 9) Include all domestic water piping and water pumps including all vacuum breakers, backflow preventers, valves, mixing valves, strainers, hose bibs, hydrants, drain valves, water hammer arrestors, trap seal primer valves and regulators. Include connection of site water piping to 5' beyond building perimeter (site water trade contractor pipes all site water to within 5' of building).
- 10) Include all sanitary waste and vent piping including all piping, fittings, gaskets, couplings, floor drains, sleeve flashings and vent caps.
- 11) Include all sump pumps, sump pump basins, covers and connectors.
- 12) Install systems, material, and equipment level and plumb, parallel, and perpendicular to other building systems.
- 13) Routing and concealing of all water, sanitary sewer, and storm sewer as required by the contract documents, for an aesthetically pleasing appearance.
- 14) Any re-work required by other Trades for a missed rough-in shall be the responsibility of this Trade Contractor.
- 15) Purging and disinfecting as required.
- 16) Include all acid neutralization tanks and associated piping and limestone chips.
- 17) Include costs for cutting and core drilling all elevated slab penetrations if not roughed in prior to pours.
- 18) Include all water, gas piping, flex connections and associated work with all kitchen equipment and utility distribution systems. Review all kitchen plans and specifications and perform all work outlined to be performed by plumber in addition to all other plans and specifications.
- 19) Settlement of trenches associated with this scope of work to be repaired by this trade contractor.
- 20) Include all excavation, suitable bedding material, backfilling, compaction, and final grading at disturbed area to within +/- one tenth of final specified grades.
- 21) Trade Contractor shall immediately remove all excess materials (spoils) from Work areas to a location designated by the Construction Manager. Any spoils damaged, overly wet, contaminated, or not suitable for backfill or fill will be this Trade Contractor's responsibility to remove to an offsite location. Trade Contractor shall be responsible for coordinating, spreading, and compacting materials (spoils) into finished work.
- 22) Include all site underground and building natural gas piping as well as all gas connections to equipment, valves, regulators, roof piping to HVAC equipment, meters, regulators, supports, unions, reducers, concrete bases and shut offs. Coordinate with ONG for location of site gas meter.
- 23) Include all foundation, elevator pit piping and under-slab drainage piping per plans.
- 24) Include installation of all kitchens and, or, culinary floor troughs and grates, furnish and install temporary plywood covers and associated piping as per the kitchen plans and specifications.
- 25) Include costs for cutting and core drilling all elevated slab penetrations if not roughed in prior to pours.

Norman Senior Center – Bid Package #3 – Site and Building

- 26) Include all water, gas piping, flex connections and associated work with all kitchen equipment and utility distribution systems. Review all kitchen plans and specifications and perform all work outlined to be performed by plumber in addition to all other plans and specifications.
- 27) Include all Ansul fire system piping, water supply lines, reducers and associated fittings and components at kitchen hoods as identified in the kitchen plans / specifications.
- 28) Furnish and install food disposal systems, grease interceptors, internal air relief bypass, cleanouts, baffles, trap seals, gasketing and fittings.
- 29) Furnish and coordinate with other Trades all penetrations through grade beams and foundations.
- 30) Include access panels for all work under this scope where required.
- 31) Trade Contractor shall re-finish and touch-up all equipment installed as part of this work as required.
- 32) Work shall include caulking, fire caulking, and sealing of all penetrations made by the execution of the work provided by this Trade Contractor.
- 33) It is the responsibility of this Trade Contractor to maintain a clean and safe working environment in accordance with applicable codes.
- 34) This Trade Contract is intended to be all inclusive of labor and equipment required for the scope of work.
- 35) This Trade Contract includes all items of work covered by the specifications be they named, inferred, or normally performed by members of Trade Contractor's industry. For purposes of clarification, we may list items to be included in addition to those which are covered in the plans and specifications.
- 36) The Trade Contractor acknowledges and agrees that any recapitulation of the work to be performed shall be for the sole and exclusive purpose of clarifying the status of those items which are included in the Trade Contractor's scope of work. Items not specifically mentioned but are normally performed by members of the Trade's industry are included as part of the Trade Contractor's Scope of Work.
- 37) All work shall be accomplished using accepted methods and procedures of the highest recognized standards and shall be done in a neat and workmanlike manner, in accordance with applicable standards and codes and the requirements of the prime contract.
- 38) All work included in this trade contract shall be according to the project/progress schedule provided by the Construction Manager. This includes day and night work as required by project schedule. If the Subcontractor falls behind schedule in the submittal portion or the installation portion of this Subcontract through no fault of the Contractor or the Owner, the Subcontractor shall work overtime or perform shift work at no extra cost to Contractor as necessary to maintain the project schedule.
- 39) Trade Contractor shall understand when their scope of work is to be put in place and include all weather protective means as required.
- 40) Coordination and phasing of work as required by Crossland Construction Co.
- 41) Include all ADA requirements applicable to system(s) and project.
- 42) Furnish, receive, offload, store, stage, inventory, and protect all materials from weather damage and/or mud. The Trade Contractor shall be responsible to correct any material damaged or muddied.
- 43) Include travel and mobilizations for field measuring.
- 44) Any damage, as a result of this Trade Contractor's work to adjacent existing structures, finishes, equipment or other tangible aspect of the project and repair, thereof, will be the responsibility of this Trade Contractor.
- 45) Trade Contractor to include daily cleanup of work. Temp labor will be provided at the Trade Contractor's expense if failure to provide daily cleanup is evident, but not before written notice to correct is given to Trade Contractor by Crossland Construction.
- 46) Trade Contractor shall include a final clean of all materials installed by this contract.
- 47) This Trade Contractor shall clean and repair any damages, due to work provided in this contract, to the streets or adjacent areas.
- 48) Trade Contractor is responsible for any track out created by employees, subcontractors, or vendors of said Trade Contractor.
- 49) Trade Contractor shall include any dewatering as necessary to perform scope of work.
- 50) Trade Contractor to include a minimum 40-hr work week. This shall mean work, put in place, by the Trade Contractor and not inclusive of travel time.
- 51) Trade Contractor to include any and all permits applicable to scope of work, including IDP, as required by the contract documents, or, as required by authorities having jurisdiction inclusive of any fees.

Norman Senior Center – Bid Package #3 – Site and Building

- 52) Trade Contractor to include coordination of testing. Testing to be paid by others, however, costs of a re-test due to failure of the Trade Contractor, shall be paid by the Trade Contractor.
- 53) Trade Contractor to include all applicable submittals and submittal requirements as identified and required by the contract documents including, but not limited to, mockups, samples, product data, shop drawings, calculations, certifications, delegated design, engineering, stamps, warranties etc.

**Exclusions:**

- 1) Sales Tax

**Alternate No. 7:** Multipurpose Gymnasium Addition.

**Base Bid:** No Multipurpose Gymnasium Building Addition.

**Alternate:** Bid trade scope above for the Multipurpose Gymnasium Building addition as indicated on the Alternate-07 Drawings.

## **TRADE CONTRACT 26A Electrical System**

**Work including but not limited to the following:**

**Drawings and Specifications:** See Attached List of Drawings/Specifications

**Project Specific Inclusions:** *Line items listed below are specific to this project and general in nature. All costs associated shall be included within the base bid for this trade contract. Scopes listed shall be priced in their entirety (inclusive of all labor, material, means of conveyance, supervision and equipment) for a complete and finished system per the contract documents.*

- 1) Includes all interior and exterior lighting.
- 2) Include all exterior light poles, bases installed by others.
- 3) Include power to all exterior doors with electrified hardware, reference door hardware specification section and door hardware schedule.
- 4) Include all conduit, raceways, and pathways for low-voltage wiring, telecom, Fire Alarm, security, and access control scope of work. Include conduit pathways for low-voltage at exposed ceiling/deck. Provide conduit with detectable fabric innerducts with pull string.
- 5) Provide power and raceways to the monument sign.
- 6) Includes all cable pathway sleeves.
- 7) Includes all necessary fire caulking / fire proofing directly related to this scope of work.
- 8) Include the supply of all access panels that are required as part of the scope of work; installation of access panels is by others.
- 9) Include all cable trays and raceways.
- 10) Include all specialty ductwork, piping and hangers required in natatorium and pool equipment areas.
- 11) Include high density foam at penetrations in natatorium for this scope of work.
- 12) Include submission of coordination drawings with shop drawings / submittals.
- 13) Include all disconnects, wiring and power to all food service, pool & mechanical equipment.
- 14) Provide all electrical grounding.
- 15) Include lighting control systems complete. Include all commissioning, programming and training.
- 16) Include wiring and power to food service equipment.
- 17) Include conduit, raceways and junction boxes required for irrigation controls.
- 18) Provide and install power curbs at open fitness.

**General Trade Inclusions:** *Line items listed below are typical or boilerplate in nature and shall be included in the base bid IF supported and required by the contract documents unless noted otherwise.*

- 54) This Trade Contract shall include all electrical distribution, equipment feeders, panels, switchgears, raceways, electrical rough-ins, underfloor raceways, cable trays, underground ducts & raceways, conduits, boxes, fittings, wire cables, fuses, switchboards, panelboards, contactors, motor starters, wiring devices, disconnects, motor starters, branch circuit wiring, building & site lighting, emergency generators, surge protection equipment, grounding, transient voltage suppression, transformers, transfer switches, low voltage cabling (not identified in separate Trade Contracts), control wiring, data conduit,

### Norman Senior Center – Bid Package #3 – Site and Building

electrical power monitoring & control, lighting control, temporary power & lighting, identification and all Work required to provide these systems complete, finished, and fully operational.

- 55) Include all site underground conduit/PVC for low voltage.
- 56) Include all camera poles, base plates, anchor bolts and leveling nuts. (concrete bases by others)
- 57) Include all electrical duct banks and all associated excavation, fill material, duct supports, spacer supports, tracer wires, warning tapes and backfilling. Include compaction of backfill material to meet structural guidelines. All spoils to be removed from site by this Trade Contractor.
- 58) Trade Contractor to include wiring and connections to all automatic flush valves including any additional wire necessary to make connection.
- 59) Provide and install all disconnects, motor starters, wiring and power to all mechanical equipment. (All variable frequency motor controllers required by HVAC Trade Contractor)
- 60) Include all low-voltage electrical power connections, conductors and cables, connectors and splices, sleeves and sleeve seals.
- 61) Include all control voltage electrical power cables including all pathways, cable trays, backboards, plywood, UTP Cable, UTP Cable hardware, optical fiber cable & hardware, low-voltage control cable, conductors & identification. (unless specifically included in another Trade Contract Scope)
- 62) All site underground electrical and communications conduits in “green spaces” (areas that are not beneath any roads, parking or hardscapes) shall be installed to a depth of 36”.
- 63) Include all grounding and bonding for electrical systems including all conductors, connectors and grounding electrodes.
- 64) Include all hangers and supports for electrical systems including all steel slotted support systems, raceway cable supports, conduit and cable support devices, support for conductors in vertical conduit, structural steel for fabricated supports and restraints, fasteners, inserts, bolts and rods.
- 65) Include all raceway and boxes for electrical systems, metal conduit & tubing, nonmetallic conduit & tubing, metal wireways, nonmetallic wireways, surface raceways, boxes, enclosures and cabinets, handholes and boxes for exterior underground wiring, sleeves for raceways and sleeve seals.
- 66) Include all cable trays for electrical systems including all fittings, covers, barrier strips, supports, connectors and warning signs.
- 67) Include all underfloor raceways, trenching, cover plates, supports, fittings, hardware, junction boxes and service fittings.
- 68) Including all underground ducts and raceways, conduits, duct accessories, concrete encased duct banks, handholes, pull boxes, manholes, steel conduit, plastic utilities duct, pre-cast manholes, knockout panels and joint sealants.
- 69) Include all vibration and seismic controls including all isolation pads, channel support systems, restraint cables, hanger rod stiffeners, anchorage bushings and washers.
- 70) Include all identification for electrical systems including all warning tapes, labels, signs, instruction signs, labels, tags, floor marking tapes and cable ties.
- 71) Include all electrical power monitoring and control including all PC based workstations and software, communication network and interface modules and all components as per the contract documents.
- 72) Include all lighting control devices, time switches, photoelectric switches, indoor occupancy sensors, outdoor motion sensors, lighting contactors, emergency shunt relays, conductors and cables.
- 73) Include all modular dimming controls and all associated components and accessories, conductors and cables.
- 74) Include all network lighting controls, panels, relays, switches, interfaces and clocks.
- 75) Include all low voltage transformers.
- 76) Include all switchboards, suppression devices, protective devices, instrumentation and control power.
- 77) Include all panelboards and components.
- 78) Include all motor control centers, main lugs and OCPDs, full & reduced voltage magnetic controllers, VFCs, TVs, instrumentation and auxiliary devices.
- 79) Include all rough-in for security system and card readers (wiring and devices by others)
- 80) Include all enclosed bus assemblies.
- 81) Include all wiring devices, receptacles, device plates, wall-box motion sensors, snap switch and wall box dimmers, fan speed controls, sensors, outlets, connector devices, cord and plug sets and floor service outlets.

Norman Senior Center – Bid Package #3 – Site and Building

- 82) Include lockable covers on all shunt trips.
- 83) Include all fuses, fuse adaptors and spare fuse cabinets.
- 84) Include all enclosed switches and circuit breakers, fusible switches, non-fusible switches, molded-case circuit breakers, molded case switches and enclosure.
- 85) Include all enclosed controllers, full voltage manual & magnetic, reduced voltage magnetic & solid state, multispeed controllers and accessories.
- 86) Include all engine generators, cooling systems, controls, monitoring, load banks, outdoor enclosures, muffler silencers, air-intake filters, starting systems, overcurrent & fault protection, exciter & voltage regulators, vibration isolator devices.
- 87) Include all transfer switches, wiring, enclosures and components.
- 88) Include all transient voltage suppression for low-voltage electrical power conduits including all suppressors, surge protection devices, panelboard suppressors and enclosures.
- 89) Include all conduit/raceway/cable tray(s) shown on the drawings including those for mounting: projectors, loudspeakers, touch panels.
- 90) Include all rough-in, conduits, raceways, pathways for all electronic safety and security systems.
- 91) Include all electrical connections, wiring, feeders, controls, raceways, rough ins, pull boxes, starters, overload protection, disconnects, coordination and all electrical work identified as being performed by this trade in the kitchen plans and specifications.
- 92) Include all smoke evacuation controls and power wiring.
- 93) Include all plywood backing required at data, and, or electrical rooms.
- 94) Include all floor boxes and specialty plates. Include all core drilling at elevated slabs as required.
- 95) Include all electrical wiring and connections for food service equipment as identified in the Kitchen plans and specifications.
- 96) Include all shunt trips, disconnects and breakers.
- 97) Include all power and electrical connections for all mechanical equipment, elevators, overhead doors, automatic doors, motorized window shades & drapery, monumental signs and any other electric powered equipment being installed by other trades.
- 98) Include all underground feeders and piping from transformer secondary termination cabinets and to building including all manholes and pull boxes, trenching and backfilling with suitable material to within +/- 1/4" of the specified elevation.
- 99) Include any required shunt trip disconnects for kitchen hoods, elevators or other equipment.
- 100) Electrical Trade Contractor shall provide and maintain temporary lighting, covers, and electricity throughout the new facility. Lamps not functioning properly shall be replaced immediately. Include removal of all temporary lighting as directed by CM.
- 101) Electrical Trade Contractor shall be responsible for all safety barricades and safety covers for electrical panels as required by OSHA, NEC, the Owner and/or CM. All temporary panels/receptacles shall be "GFI" protected by this Contract.
- 102) Trade Contractor shall provide a temporary electric panel to two locations (in the main building as necessary for construction in all areas and one at the southeast parking lot for contractor trailers) and provide all maintenance of panels as required. Include all cost of getting power service to panels. Panels shall be large enough to accommodate construction activities.
- 103) Include all site underground conduits for communications and power including conduit, ducts, ducts accessories, duct banks, boxes, warning tapes and trace wire.
- 104) Include all building wires, cables, and associated connectors, splices, and terminations for wiring systems as required for complete, operational and finished systems.
- 105) Include all raceways, fittings, boxes, enclosures, cable trays and cabinets for electrical systems, telephone/data conduit, audio visual, fire alarm, security and all electrical and low voltage systems.
- 106) Include all unistrut rack mounting.
- 107) Include wiring of all access controls, overhead doors and electric strikes.
- 108) Include all power & wiring for fire pump.
- 109) Provide oversized trim plates as required. Provide blank cover plates on all boxes not used.
- 110) Trade Contract to include pull strings in conduits that are for future use or cabled by other trades.
- 111) Trade Contractor shall be responsible for terminating all power at mechanical equipment, including equipment furnished by other trades. Test to verify equipment is wired correctly.

Norman Senior Center – Bid Package #3 – Site and Building

- 112) Furnish and install all steel supports as required for mounting the electrical equipment.
- 113) Work shall include caulking, fire caulking, fire stop, "link-seal", fire barrier, penetration seals, sealing, and waterproofing of all penetrations by the execution of the Work provided by this Trade Contractor.
- 114) Trade Contractor shall be responsible for coordinating, scheduling, delivery, receiving, unloading, storage, inventorying, placement, protection, and cleanup.
- 115) It shall be the responsibility of this Trade Contractor to obtain and pay all licenses, permits, fees, inspections, and certification required for the execution of this Work.
- 116) Trade Contractor shall set all boxes in walls to enable a flush mount to be made with a cover plate to the wall. It is the responsibility of this Trade Contractor to install all boxes to this, and the contract documents requirements. Any boxes not meeting these requirements will be corrected, with the cost to be met by this Trade Contractor.
- 117) Trade Contractor shall review all mechanical/plumbing schedules and provide all electrical work required for complete, finished, and operational systems.
- 118) Trade Contractor shall provide fireproofing around recessed fixtures installed in fire rated ceilings.
- 119) Trade Contractor shall secure all lay-in fixtures into the ceilings and install all additional wire hangars as required.
- 120) Include conduit, wiring, power, connections, transformers to site water feature lights, jets & pumps, power to fountains at ponds.
- 121) Furnish and install any/all access panels as required by this work.
- 122) Provide all labeling, nameplates, markings, identification, and signage as required for work provided by this Trade Contract.
- 123) Provide all supporting devices as required for work provided under this Trade Contract.
- 124) This Trade Contract shall be responsible for coring any/all penetrations required for execution of this Work. Include all coring, caulking, fire caulking, and sealing of all penetrations. Any penetrations required by the electrical in the concrete, and miscellaneous walls will be the Electrical Trade Contractors' responsibility. Any missed penetrations will be the responsibility of the Electrical Trade Contractor to correct to original conditions. Materials damaged while correcting penetrations will be the responsibility of the Electrical Contractor to repair to original condition.
- 125) Electrical Trade Contractor shall be responsible for any and all layout required for work provided under this Trade Contract including any necessary surveying.
- 126) Contractor shall provide a representative at all startups to assist as needed.
- 127) Trade Contractor shall not mark or damage walls, ceiling finishes, floors, or any other finishes. All repairs to damaged finishes due to failure to meet these requirements shall be corrected and paid by this Trade Contract.
- 128) Trade Contractor shall refinish, restore, and touchup damaged paint on equipment and materials to original condition.
- 129) This trade contractor to perform and provide the Construction Manager an inventory of light fixtures as they arrive on site as well as identify long lead time light fixtures and their status throughout the course of the project.
- 130) It is the responsibility of this Trade Contractor to maintain a clean and safe working environment in accordance with applicable codes.
- 131) This Trade Contract is intended to be all inclusive of labor and equipment required for the scope of work.
- 132) This Trade Contract includes all items of work covered by the specifications be they named, inferred or normally performed by members of Trade Contractor's industry. For purposes of clarification, we may list items to be included in addition to those which are covered in the plans and specifications.
- 133) The Trade Contractor acknowledges and agrees that any recapitulation of the work to be performed shall be for the sole and exclusive purpose of clarifying the status of those items which are included in the Trade Contractor's scope of work. Items not specifically mentioned but are normally performed by members of the Trade's industry are included as part of the Trade Contractor's Scope of Work.
- 134) All work shall be accomplished using accepted methods and procedures of the highest recognized standards and shall be done in a neat and workmanlike manner, in accordance with applicable standards and codes and the requirements of the prime contract.
- 135) All work included in this trade contract shall be according to the project/progress schedule provided by the construction manager. This includes day and night work as required by project schedule. If the

### Norman Senior Center – Bid Package #3 – Site and Building

Subcontractor falls behind schedule in the submittal portion or the installation portion of this Subcontract through no fault of the Contractor or the Owner, the Subcontractor shall work overtime or perform shift work at no extra cost to Contractor as necessary to maintain the project schedule.

- 136) Trade Contractor shall understand when their scope of work is to be put in place and include all weather protective means as required.
- 137) Coordination and phasing of work as required by Crossland Construction Co.
- 138) Include all ADA requirements applicable to system(s) and project.
- 139) Furnish, receive, offload, store, stage, inventory, and, protect all materials from weather damage and/or mud. The Trade Contractor shall be responsible to correct any material damaged or muddied.
- 140) Include travel and mobilizations for field measuring.
- 141) Any damage, as a result of this Trade Contractor's work to adjacent existing structures, finishes, equipment or other tangible aspect of the project and repair, thereof, will be the responsibility of this Trade Contractor.
- 142) Trade Contractor to include daily cleanup of work. Temp labor will be provided at the Trade Contractor's expense if failure to provide daily cleanup is evident, but not before written notice to correct is given to Trade Contractor by Crossland Construction.
- 143) Trade Contractor shall include a final clean of all materials installed by this contract.
- 144) This Trade Contractor shall clean and repair any damages, due to work provided in this contract, to the streets or adjacent areas.
- 145) Trade Contractor is responsible for any track out created by employees, subcontractors, or vendors of said Trade Contractor.
- 146) Trade Contractor shall include any dewatering as necessary to perform scope of work.
- 147) Trade Contractor to include a minimum 40-hr work week. This shall mean work, put in place, by the Trade Contractor and not inclusive of travel time.
- 148) Trade Contractor to include any and all permits applicable to scope of work, including IDP, as required by the contract documents, or, as required by authorities having jurisdiction inclusive of any fees.
- 149) Trade Contractor to include coordination of testing. Testing to be paid by others, however, costs of a re-test due to failure of the Trade Contractor, shall be paid by the Trade Contractor.
- 150) Trade Contractor to include all applicable submittals and submittal requirements as identified and required by the contract documents including, but not limited to; mockups, samples, product data, shop drawings, calculations, certifications, delegated design, engineering, stamps, warranties etc.

### **Exclusions:**

- 1) Sales Tax

### **Alternate No. 7:** Multipurpose Gymnasium Addition.

**Base Bid:** No Multipurpose Gymnasium Building Addition. Provide light poles for exterior pickleball court.

**Alternate:** Bid trade scope above for the Multipurpose Gymnasium Building addition as indicated on the Alternate-07 Drawings. Exclude light poles for exterior pickleball court.

### **Alternate No. 8:** Building Lightning Protection.

**Base Bid:** No Building Lightning Protection, just the main grounding wire to the roof for future lightning protection connection.

**Alternate:** Provide and install full building lightning protection as indicated on Alternate-08 drawings.

**Alternate No. 10:** Building Electrical Feeders

**Base Bid:** Provide and install aluminum feeders for service lines over 100 amps.

**Alternate:** Provide and install copper feeders for service lines over 100 amps.

## **TRADE CONTRACT**

### **27A Data & Communications**

**Work including but not limited to the following:**

**Drawings and Specifications:** See Attached List of Drawings/Specifications

**Project Specific Inclusions:** *Line items listed below are specific to this project and general in nature. All costs associated shall be included within the base bid for this trade contract. Scopes listed shall be priced in their entirety (inclusive of all labor, material, means of conveyance, supervision and equipment) for a complete and finished system per the contract documents.*

- 19) All work shall be accomplished using accepted methods and procedures of the highest recognized standards and shall be done in a neat and workmanlike manner, in accordance with applicable standards and codes and the requirements of the prime contract.
- 20) All work included in this trade contract shall be according to the project/progress schedule provided by the construction manager. This includes day and night work as required by project schedule. If the Subcontractor falls behind schedule in the submittal portion or the installation portion of this Subcontract through no fault of the Contractor or the Owner, the Subcontractor shall work overtime or perform shift work at no extra cost to Contractor as necessary to maintain the project schedule.
- 21) Trade Contractor shall understand when their scope of work is to be put in place and include all weather protective means as required.
- 22) Coordination and phasing of work as required by Crossland Construction Co.
- 23) Include all ADA requirements applicable to system(s) and project.
- 24) Furnish, receive, offload, store, stage, inventory, and protect all materials from weather damage and/or mud. The Trade Contractor shall be responsible to correct any material damaged or muddied.
- 25) Include travel and mobilizations for field measuring.
- 26) Any damage, as a result of this Trade Contractor's work to adjacent existing structures, finishes, equipment or other tangible aspect of the project and repair, thereof, will be the responsibility of this Trade Contractor.
- 27) Trade Contractor to include daily cleanup of work. Temp labor will be provided at the Trade Contractor's expense if failure to provide daily cleanup is evident, but not before written notice to correct is given to Trade Contractor by Crossland Construction.
- 28) Trade Contractor shall include a final clean of all materials installed by this contract.
- 29) This Trade Contractor shall clean and repair any damages, due to work provided in this contract, to the streets or adjacent areas.
- 30) Trade Contractor is responsible for any track out created by employees, subcontractors, or vendors of said Trade Contractor.
- 31) Trade Contractor shall include any dewatering as necessary to perform scope of work.
- 32) Trade Contractor to include a minimum 40-hr work week. This shall mean work, put in place, by the Trade Contractor and not inclusive of travel time.
- 33) Trade Contractor to include any and all permits applicable to scope of work, including IDP, as required by the contract documents, or, as required by authorities having jurisdiction inclusive of any fees.
- 34) Trade Contractor to include coordination of testing. Testing to be paid by others, however, costs of a re-test due to failure of the Trade Contractor, shall be paid by the Trade Contractor.
- 35) Trade Contractor to include all applicable submittals and submittal requirements as identified and required by the contract documents including, but not limited to, mockups, samples, product data, shop drawings, calculations, certifications, delegated design, engineering, stamps, warranties etc.

Norman Senior Center – Bid Package #3 – Site and Building

**Exclusions:**

- 1) Sales tax

**Alternate 18:** Waterline Size Reduction

**Base Bid:** 8" Waterline per plans and specifications

**Alternate:** Deduct cost to utilize 6" waterline in lieu of all 8" site water lines.

## TRADE CONTRACT

### 33B Storm Sewer & Drainage

**Work including but not limited to the following:**

**Drawings and Specifications:** See Attached List of Drawings/Specifications

**Project Specific Inclusions:** *Line items listed below are specific to this project and general in nature. All costs associated shall be included within the base bid for this trade contract. Scopes listed shall be priced in their entirety (inclusive of all labor, material, means of conveyance, supervision and equipment) for a complete and finished system per the contract documents.*

- 1) Storm water system complete.
- 2) New area inlets, new area inlet on existing storm structure, roof drain tie-ins, storm boxes, concrete aprons around area inlets, storm sewer cleanouts, pipe bedding materials, joints, include complete removal and disposal of existing inlet to be removed. Tie-ins to existing storm water system and manholes.

**General Trade Inclusions:** *Line items listed below are typical or boilerplate in nature and shall be included in the base bid IF supported and required by the contract documents unless noted otherwise.*

- 1) Include all storm sewer systems including all concrete headwalls, inlets, rip rap, area drains, grouted rip rap, filter fabric, cleanouts, piping, HDPE, RCP, basins, end sections, concrete collars, junction boxes, tees, all sealing, grouting, excavation, subgrade preparation, backfilling and haul off for a complete and finished storm sewer system.
- 2) Include all perforated HDPE storm piping.
- 3) Include storm pipe connection to existing storm sewer system, if required by the contract documents.
- 4) Final connection to the roof drain piping shall be by the Plumbing Trade Contractor. This Trade Contractor to install storm piping to connection location, which shall be no less than 5'-0" from the face of the building, and install fittings to allow for a connection by Plumbing should the main storm line be within 5'-0" of the building running parallel. Plumbing Trade Contractor shall furnish and install the 90-degree connection/pipe boot, and, make the connection to the storm pipe.
- 5) This Trade Contract is responsible for dust control as well as cleaning of the public streets if mud is tracked out due to earthwork operations associated with this scope of work.
- 6) Trade contractor shall protect all survey control points by clearly marking them and placing (4) T-posts around the perimeter of each. Costs associated with replacing control points will be by this Trade Contractor (unless damaged by others).
- 7) Construction Manager is to provide initial surveyed control points. All additional surveying, daily construction layout, staking & elevations necessary to complete this work shall be included by this Trade Contract.
- 8) This Trade Contractor to include correction of settled and eroded areas throughout construction that is associated with this scope of work.
- 9) This Trade Contract shall verify all utility locations and terminations shown on the drawings. Protection of existing utilities during demolition operations, grubbing, & earthwork processes. Trade Contractor shall call for existing utility locates as required to complete this Work.
- 10) Conduct site operations to ensure minimum interference with roads, streets, walks, and other adjacent occupied or used facilities. Do not close or obstruct roads, walks, or other areas of work unless approved

### Norman Senior Center – Bid Package #3 – Site and Building

by the Construction Manager. This Trade Contractor to include any necessary signage, barricades, flag personnel as required by local authorities.

- 11) Trade Contractor is responsible for pot holing or hydro-vac procedures if any excavation within 10' of a known existing utility will be required.
- 12) It is the responsibility of this Trade Contractor to maintain a clean and safe working environment in accordance with applicable codes.
- 13) This Trade Contract is intended to be all inclusive of labor and equipment required for the scope of work.
- 14) This Trade Contract includes all items of work covered by the specifications be they named, inferred or normally performed by members of Trade Contractor's industry. For purposes of clarification, we may list items to be included in addition to those which are covered in the plans and specifications.
- 15) The Trade Contractor acknowledges and agrees that any recapitulation of the work to be performed shall be for the sole and exclusive purpose of clarifying the status of those items which are included in the Trade Contractor's scope of work. Items not specifically mentioned but are normally performed by members of the Trade's industry are included as part of the Trade Contractor's Scope of Work.
- 16) All work shall be accomplished using accepted methods and procedures of the highest recognized standards and shall be done in a neat and workmanlike manner, in accordance with applicable standards and codes and the requirements of the prime contract.
- 17) All work included in this trade contract shall be according to the project/progress schedule provided by the construction manager. This includes day and night work as required by project schedule. If the Subcontractor falls behind schedule in the submittal portion or the installation portion of this Subcontract through no fault of the Contractor or the Owner, the Subcontractor shall work overtime or perform shift work at no extra cost to Contractor as necessary to maintain the project schedule.
- 18) Trade Contractor shall understand when their scope of work is to be put in place and include all weather protective means as required.
- 19) Coordination and phasing of work as required by Crossland Construction Co.
- 20) Include all ADA requirements applicable to system(s) and project.
- 21) Furnish, receive, offload, store, stage, inventory, and, protect all materials from weather damage and/or mud. The Trade Contractor shall be responsible to correct any material damaged or muddied.
- 22) Include travel and mobilizations for field measuring.
- 23) Any damage, as a result of this Trade Contractor's work to adjacent existing structures, finishes, equipment or other tangible aspect of the project and repair, thereof, will be the responsibility of this Trade Contractor.
- 24) Trade Contractor to include daily cleanup of work. Temp labor will be provided at the Trade Contractor's expense if failure to provide daily cleanup is evident, but not before written notice to correct is given to Trade Contractor by Crossland Construction.
- 25) Trade Contractor shall include a final clean of all materials installed by this contract.
- 26) This Trade Contractor shall clean and repair any damages, due to work provided in this contract, to the streets or adjacent areas.
- 27) Trade Contractor is responsible for any track out created by employees, subcontractors, or vendors of said Trade Contractor.
- 28) Trade Contractor shall include any dewatering as necessary to perform scope of work.
- 29) Trade Contractor to include a minimum 40-hr work week. This shall mean work, put in place, by the Trade Contractor and not inclusive of travel time.
- 30) Trade Contractor to include any and all permits applicable to scope of work, including IDP, as required by the contract documents, or, as required by authorities having jurisdiction inclusive of any fees.
- 31) Trade Contractor to include coordination of testing. Testing to be paid by others, however, costs of a re-test due to failure of the Trade Contractor, shall be paid by the Trade Contractor.
- 32) Trade Contractor to include all applicable submittals and submittal requirements as identified and required by the contract documents including, but not limited to; mockups, samples, product data, shop drawings, calculations, certifications, delegated design, engineering, stamps, warranties etc.

### **Exclusions:**

- 1) Sales Tax

## **BID PACKAGE GENERAL CONDITIONS**

**Each Trade Contract shall INCLUDE the following list of Work items/directives in the scope and cost of the Trade Contract**

### **1) SUBMITTALS:**

- A. All submittals must be submitted to the CM within 21 calendar days of the execution of the Contract.
- B. Resubmittals must be resubmitted within 10 calendar days of the date of submittal return. Fines in the amount \$500.00 per calendar day for submittals not meeting the aforementioned requirements will be charged to this Contract. Exceptions must be in writing from CM.
- C. Trade Contractor shall submit insurance certificate, bonds, schedule of values, and fully executed Contract Agreement within 10 days of award of Contract.
- D. All shop drawings, submittals, samples, as-builts, test certifications, and owners' manuals as required by the Contract Documents.
- E. Trade Contractor to submit all "final closeout documents" & "letters of conformance" before final payment or reduction in retainage will be made.
- F. Bonds (see Contract Security/Bonds section of Bid Package) will be required. Cost of bonds to be identified on Bid Form.

### **2) CONSTRUCTION:**

- A. The Contract Documents are complementary. What is called for by anyone shall be binding as if called for by all. If there is a conflict in the Contract Documents, the following order of precedence shall govern:
  - 1. Agreement
  - 2. Bid Package/Trade Contract Scope
  - 3. Supplementary Conditions
  - 4. General Conditions
  - 5. Specifications
  - 6. Drawings
  - 7. Geotechnical Report
- B. Trade Contractor shall include all parts, components, work and material required to provide complete, operational, and finished systems in the bid. Any minor Work not specifically mentioned but obviously necessary and considered normal construction practice for the proper completion of the Work, shall be considered as being part of, and included in, the Trade Contract.
- C. The Trade Contractor shall perform all Work called for in the Trade Contract including the furnishing of all equipment, materials, labor, tools, and supervision necessary for the performance of all things necessary for the Work. All Work shall be accomplished in a Workman-like manner with the understanding that the Owner, at its option, furnish any such labor, materials, equipment or supplies, as it deems necessary or desirable within the limits of the Contract Documents.
- D. Each Trade Contractor shall attend weekly progress meetings with involved Trade Contractors, subcontractors, Construction Manager, & the Owner.
- E. Storage required by the Trade Contractor shall be in areas designated by the Construction Manager, storage of materials shall be in trailers, roll offs, or areas outside of the building areas. Areas inside of the building shall not be used for storage. All materials stored on the ground must be stored on dunnage.
- F. Coordination & Phasing of work as required by Construction Manager. Provide all coordination required

### Norman Senior Center – Bid Package #3 – Site and Building

for completion of this work with other trades. Coordination must be done in a timely and professional matter. Any and all costs associated with lack of coordination on the part of this Contractor will be charged to this Contract.

- G. Trade Contractor shall provide all layout, staking, grades, and elevations as required by this Contract. Initial building layout will be by the Construction Manager. Daily construction layout, elevations, and layout required by this Trade Contractor shall be included in his Trade Contract.
- H. Trade Contractor shall include all misc. equipment required for permits, freight, receiving, unloading, and installation of the Work furnished in this Trade Contract.
- I. Trade Contractor shall comply with all directions, requirements, and provide all information as required by the Storm Water Prevention Plan Permit (SWPPP).
- J. Trade Contractor shall final clean all material supplied or installed under this Contract.
- K. Trade Contractor shall provide any and all drinking water required by Trade Contractor's employees or Subcontractor's employees.
- L. Any temp electric, fax, & phones required by the Trade Contractor's employees and Trade Contractor's subcontractors.
- M. Trade Contractor shall include all offsets as required to coordinate with other trades.
- N. Trade Contractor shall provide protection of stored materials and finished work. Provide protection necessary to prevent damage to existing improvements, existing vegetation, trees, asphalt, STUCCO, utilities, fences, buildings, adjoining properties, and Owner's property. Any and all costs associated with surroundings damaged during the work of this Contract will be the responsibility of this Contract.
- O. Trade Contractor shall include any costs & coordination associated with permits, fees or licenses (as required by your work), and as required to provide complete, operational, & acceptable finished Work.
- P. Trade Contractor shall include all general conditions, overhead, profit, and insurance.
- Q. Trade Contractor is responsible for receiving, offloading, inventory, storing, staging, installation, and connection of all materials or equipment furnished by the Owner that is included in the Work specified in the Trade Contractor Specification Sections (sections identified in Trade Contract's Scope of Work).
- R. Trade Contractor shall provide any cold weather protection required by the Work provided under this Trade Contract.
- S. Trade Contractor shall conduct site operations to ensure minimum interference with roads, streets, walks, and other adjacent occupied or used facilities. Do not close or obstruct roads, walks, or other areas of work unless approved by Construction Manager.

### **3) SAFETY REQUIREMENTS & SITE POLICIES:**

- A. By bidding this Trade Contract, Contractor agrees to comply with CCC Safety Requirements & Site Policies for all employees, subcontractors, and subcontractors' employees. Failure to adhere to jobsite regulations shall result in fines against this Trade Contractors' Contract or termination of the Contract. Fines for violations will be \$500.00 per daily incident. Fines shall be given to a charity of the Owner's choice. Trade Contractor to orientate each employee and subcontractor to these requirements. Each subcontractor shall complete the requirements acknowledgement form (see inclusions).
- B. Trade Contractor shall delegate a competent onsite safety officer. This person shall inspect the site daily for safety issues.
- C. Permission shall be obtained from the Construction Manager prior to taking any vehicle into the building. Only company vehicles shall be allowed on the construction site; all others shall use the employee parking lot designated on the construction site. The company's name and/or shall be visible from a distance of 25' away.
- D. It is the policy of the Owner that no smoking will be permitted in the building once the roof and sidewalls are installed. The fine for smoking in the building shall be \$50 per infraction. All fines will be paid by the Contractor to the Owner's designated charity. All Trade Contractor and sub contractors' employees shall

Norman Senior Center – Bid Package #3 – Site and Building

abide by this policy. Smoking will be permitted in designated areas only.

- E. Confine vehicle parking and all vehicle deliveries to only those areas designated by the Construction Manager.
- F. Trade Contractor shall confine operations to the areas contained within the property lines as shown on the drawings.
- G. Trade Contractor shall provide traffic control as required, in accordance with U.S. Department of Transportation “Manual of Uniform Traffic Control Devices” and the state highway department requirements and/or municipality or other jurisdictional body or the Construction Manager.
- H. Trade Contractor shall provide all materials and/or equipment required to provide a safe work-zone. Safety must meet all OSHA requirements and Crossland Construction Co. safety policies, including hardhats, safety fencing, handrails, and misc. required to comply with OSHA & Crossland safety policies. No exceptions will be made or given. CM will correct items not meeting requirements and any costs associated with this correction will be charged to this Contract.
- I. Trade Contractor shall verify with all local utilities all utility locations and terminations shown on the drawings. Utility locates as required.
- J. Trade Contractor to comply with all directions, requirements, and provide all information as required by the Storm Water Prevention Plan. All requirements of Erosion & Sedimentation Control shall be adhered to.
- K. All the aforementioned rules shall apply as well as the jobsite specific rules. See Attachment “B” for jobsite specific requirements & policies
- L. Trade Contractor and all tiers of subcontractors shall conduct weekly safety meetings on the jobsite. Attendees and minutes of the weekly safety meetings are to be documented.

**4) CLEANUP & HOUSEKEEPING:**

- A. Trade Contractor shall include daily cleanup, removal of all trash, debris, and excess materials to dumpster.
- B. Trade Contractor shall clean waste & mud from streets/roads during the work completed in this Trade Contract. Streets shall be thoroughly cleaned and/or swept on a daily basis or more frequently as required by Construction Manager.
- C. In the event the Construction Manager or the Owner feels the project housekeeping and cleanup is not satisfactory, upon written notice, the Construction Manager will provide the necessary cleanup, and all related costs will be at the expense of the Trade Contractor(s).

**5) PROJECT SCHEDULE:**

- A. The Trade Contractor shall attend scheduling meetings as required by the Construction Manager and coordination conferences as required by the Construction Manager. These meetings will establish communication, coordination, and cooperation for scheduling. The Trade Contractor shall utilize the Construction schedule for the work as prepared by the Construction Manager. The schedule shall be related to the entire project and shall establish critical dates for performance of this Trade Contract, which affects performance of other Work.
- B. The Trade Contractor shall schedule their forces for a minimum forty (40) hour work week. Should the updated schedule show the Trade Contractor to be behind schedule, the Trade Contractor shall devise a plan for recovery of lost time within 96 hours and submit to the Construction Manager said plan. Once the Construction Manager approves the plan, the Trade Contractor shall institute it immediately. The Trade Contractor shall bear all costs and expenses related to recovery from the Trade Contractor’s delay including costs to other Contractors on the project site.
- C. Trade Contractor shall include all overtime as required to comply with the Project Schedule.

**6) TAXES:**

- A. This is a Tax-Exempt project and a tax-exempt form will be given to successful low bidders.

**7) DAILY REPORTS:**

- A. Each Trade Contractor shall file daily with the Construction Manager a daily field report, giving the Trade Contractor's and Subcontractor's name, foreman or superintendent's name, number of workers, and a brief scope of Work for all tiers.
- B. Trade Contractor's superintendent is to checkout with the Construction Manager when demobilizing and leaving the project on either a temporary or permanent basis.

**8) PROJECT CLOSEOUT:**

- A. The Owner reserves the right to take possession and use any completed or partially completed portion of the project, providing it does not interfere with the Contractor's Work. Possession or use of the project shall not be considered final acceptance, nor shall such occupancy relieve the Trade Contractor or Subcontractors of liability to perform any Work that has not been completed at the time of occupancy.
- B. Prior to completion of the Work under this Contract, partial occupancy by the Owner and separate Contractors will be necessary for installation of equipment.
- C. Cooperation in segregation of construction activities is required and is agreed to by the Trade Contractor.
- D. Trade Contractor to submit all "final closeout documents" & "letters of conformance" before final payment or reduction in retainage will be made.

**9) WEATHER:**

- A. Weather delays shall be as defined by contract documents

**10) EROSION/SEDIMENTATION CONTROL / SWPPP:**

- A. Provide dewatering, silt fence, & erosion control for all Work (including excavations, spoils, trenches, and stockpiles) provided by this Trade Contract as required by construction documents & SWPPP.
- B. This Contract to comply with all directions, requirements, and provide all information as required by the Storm Water Prevention Plan.
- C. Any cost associated with rectifying damaged surroundings due to negligence by this Trade Contractor, will be the sole responsibility of this Trade Contractor.
- D. Any cost associated with rectifying damages to the wetlands areas do to negligence by this Trade Contractor will be the sole responsibility of this Trade Contractor.

**11) DAMAGES:**

- A. If the Trade Contractor refuses, neglects, or fails to complete the Work within the time stated at each Phase in the Trade Contract Schedule, then the Trade Contractor and the Trade Contractor's surety, if any, shall be liable for and shall pay the Construction Manager, not as a penalty but as liquidated damages, the sum of two-hundred fifty dollars (\$250.00) for each calendar day that the Trade Contractor is in default after the time stipulated in the Trade Contract Schedule for completing the Work of each Phase until the Work is Substantially Complete. The Construction Manager may withhold from payments due the Trade Contractor, such amounts as may be assessed as liquidated damages. Upon Substantial and Final

Norman Senior Center – Bid Package #3 – Site and Building

Completion of the Work, the Construction Manger may adjust the Contract Sum by the amount of the assessed liquidated damages.

**12) UNIT PRICES:**

- A. For CM/Owner information, provide all Unit Prices.
- B. The unit prices shall include all labor, material (including waste), tools, equipment, general conditions, overhead, profit, bond, and inclusions/exclusions per the base Contract.
- C. The contractor shall be paid for actual measured quantity of work multiplied times the unit price. Waste factors shall be included in the unit price.
- D. **NOTE:** The request for this information does not change unclassified excavation specified in base bid.

**13) CHANGES:**

- A. Contractor's markup, overhead, and profit on change orders are not to exceed ten percent (10%) combined or as dictated in the contract documents.
- B. Subcontractor must submit any changes in cost to adjust the Contract amount by use of written Change Order. Neither the CM nor the Owner will accept any adjustments from the Trade Contractor, except for those submitted as a written Change Order Request with a cost breakdown. Change orders are not to be billed until an official Change Order is issued by CM.
- C. Trade Contractor to adhere to all CM accounting requirements.

**14) CONTRACT SECURITY/BONDS:**

- A. For Subcontracts at or above \$50,000.00, the Trade Contractor shall furnish the following surety bonds, (with sufficient sureties to be approved by the Owner), when the contract is awarded:
  - 1. Performance Bond - 100% of Contract
  - 2. Statutory Bond - 100% of Contract
  - 3. Guarantee/Warranty Bonds - 100% of Contract – As required by CM
- B. If required - Warranty Bonds shall guarantee against and shall remedy any defect due to faulty materials or workmanship and shall pay for any damages to other work resulting therefrom, which may appear from within a period of one year from the date of completion as evidence by the date of the final acceptance of the project.

**15) BID SECURITY TO BE FURNISHED BY EACH BIDDER WITH THEIR BID:**

- A. Bids for Trade contracts over \$50,000.00, must be accompanied by a certified or cashier's check or a bid bond in an amount equal to five (5%) of the total amount of the bid as guarantee that, if awarded the contract, the bidder will execute the contract and furnish bonds and insurance as required in the General and Supplemental conditions. The successful bidder's check or bid bond will be retained until he has entered into a satisfactory contract and has furnished bonds and insurance. The Owner reserves the right to hold the bid security of the three lowest bidders until the successful bidder has entered into a contract and has furnished the required bonds and insurance.
- B. No bid security is required if bid is \$50,000.00 or less. Should the successful bidder fail to enter into a contract and furnish the required bonds and insurance within twenty (20) days after the contract has been awarded, then the successful bidder shall forfeit to the Owner the cost of republication of notice to bidders, all actual expenses incurred by reason of bidder's default and the difference between the low bid of the

Norman Senior Center – Bid Package #3 – Site and Building

bidder to whom the contract is subsequently awarded.

- C. The amount of said forfeiture shall not exceed the total amount deposited as security and shall be forfeited to the Owner as liquidated damages and not as penalty. Negligence on the part of Bidder in preparing or submitting the bid confers no right for the withdrawal of the bid after it has been opened and shall not constitute a defense to or excuse from the requirements of this provision.

**16) PAYMENT:**

- A. Trade Contractor shall bill the CM by the 20<sup>th</sup> of each month. Payment for the billing will be made by the 30<sup>th</sup> of the following month. (i.e. Billing on February 25 will be paid by March 30).
- B. Trade Contractor shall submit a schedule of values with the signed Trade Contract Agreement. CM will approve the schedule of values before the first billing by Trade Contractor.
- C. Trade Contractor shall submit a Request for Payment on AIA forms.
- D. As-built drawings & owner's manuals are to be a line item on the schedule of values.
- E. The Owner/CM will hold five percent (5%) retainage throughout the Project. Upon completion of the Work provided by this Trade Contractor, the Work will be reviewed by the CM, Architect and Owner for conformance with the Contract Documents. Once accepted by the CM, Architect and Owner the Trade Contractor may submit a pay requisition for release for retainage.
- F. Trade Contractor shall submit statement that the Work provided by the Trade Contractor is complete.
- G. Trade Contractor shall submit all as-built drawings, owners' manuals, and extra materials before submitting final payment.

**17) DEFINITIONS:**

- A. The term "Owner" shall mean City of Norman and/or the person or entity identified as such and is referred to throughout the Contract Documents as if singular in number.
- B. The "Construction Manager" shall mean Crossland Construction Company, Inc. and/or the Construction Manager's employee or representative with authorization to act on behalf of the Construction Manager.
- C. The term "Architect/Engineer", "Architect", and/or "Engineer" shall mean the consulting "Architect" and/or consulting "Engineer" who prepared the Contract Documents for the Project and whose name and address appears on the Project Documents.
- D. The term "Trade Contractor" shall mean the person, persons, partnership, company, firm, or corporation entering into the Contract for the performance of the Work required by it, and the legal representative of said party, or agent appointed to act for said party in the performance of the Work.
- E. The term "Contract" shall mean collectively, the Agreement, Bid Package, General Conditions, Special Conditions, Supplementary Conditions, Specifications, Drawings, and the Addenda issued prior to execution of the Agreement, or other documents listed in the Agreement and modifications issued after execution of the Agreement.
- F. The term "Subcontractor" shall mean a person or entity that has a direct Contract or an assigned Contract with a Contractor to perform any of the Work at the site. The term Subcontractor means a Subcontractor or a Subcontractor's authorized representative.
- G. The term "Work" shall mean the entire completed construction of the various separately identifiable parts thereof required to be furnished under the Contract Documents.
- H. The term "Change Order" shall refer to the only document that can change the requirements of the Contract. Verbal instructions, notes, memos, RFI responses, and other communication not in the form of a change order cannot change the Contract.
- I. The term "Substantial Completion" is the stage in the progress of the work or designated portion thereof that is sufficiently complete in accordance with the Contract Documents so the Owner can utilize the Work for its intended use.

Norman Senior Center – Bid Package #3 – Site and Building

- J. The term “Nonconforming Work” shall mean portions of the Work that do not comply with the Contract Documents and reference standards.
- K. The term “As Required” shall mean Work or an item of work that shall be executed/completed by the Trade Contractor as directed by the Owner, Architect, Engineer, Authorities having Jurisdiction, or the Construction Manager and/or work that is required by the Contract Documents to provide complete, operational, and finished Work.
- L. The term “Complete” shall mean all Work included in the Contract Documents, and/or to provide Work finished and ready for fully loaded operation.
- M. The term “Provide” shall mean furnishing materials, installing materials, and any other Work required to furnish complete and finished systems as described.

\_\_\_\_\_

**Base Bid (including payment/performance bond costs if over \$50,000):** \$ \_\_\_\_\_

**\*\*\*Note: Please be advised that for Combination Pricing to be considered, applicable individual Trade Contracts MUST be filled out as well. Failure to do so will deem the bidders Combination Pricing non-responsive. The intent of Combination Pricing is to capture discounts through the award of multiple packages\*\*\***

**\*\*The Following Attachments A, B, C, D, E, F & G are to be included in your Sealed Bid Envelope\*\***

## **Trade Contract Attachment “A”**

The Bidder hereby agrees to commence work under this Contract on a date to be specified in a written “Notice to Proceed” by Crossland Construction Co. and to fully complete the Project within the time specified.

**The Owner (City of Norman) and/or Crossland Construction Co. reserve the right to reject any or all bids or to waive any formalities or irregularities in any bid, and to accept the bid or bids which seem most advantageous to the Owner.**

In the event a Contract is awarded to the successful Bidder, it shall be executed within ten (10) days. The Bidder shall return with his executed Contract all Performance Payment Bonds, Statutory Bonds, Warranty Bonds and Insurance Provisions as required by the Supplementary Conditions and the Trade Contract’s scope of work.

If the successful Bidder fails or refuses to enter into a Contract as required by the Owner or fails to provide the required bonds and insurance to the Owner, within the time limited, said Bidder shall forfeit to the Owner the difference between the low bid of said defaulting bidder and the amount of the bid of the Bidder to whom the Contract is subsequently awarded and the cost, if any, of republication of notice to bidders and all actual expense incurred by reason Bidder’s default. The amount of said forfeiture shall not exceed the total amount deposited as security and shall be forfeited to the Owner as liquidated damages and not as a penalty. Negligence on the part of Bidder in preparing or submitting the bid confers no right for the withdrawal of the bid after it has been opened and shall not constitute a defense to or excuse from the requirements of this Provision.

**BIDDER ACKNOWLEDGES ADDENDUM/ADDENDA:** \_\_\_\_\_ **thru** \_\_\_\_\_

**BIDDER ACKNOWLEDGES ATTACHMENTS “A” THRU “G”:** \_\_\_\_\_

**Attachments:**

- Attachment “A” – Bid Acknowledgement
- Attachment “B” - The Affidavit of Non-Discrimination & Non-Segregation
- Attachment “C” - Safety Requirements & Jobsite Policies
- Attachment “D” – List of Drawings and Specifications
- Attachment “E” - Insurance Minimum Requirements
- Attachment “F” – False Information Affidavit
- Attachment “G” – Schedule

AFFIDAVIT OF NONDISCRIMINATION, NON-SEGREGATED FACILITIES

ANTI-COLLUSION AND BUSINESS RELATIONSHIPS

STATE OF \_\_\_\_\_

COUNTY OF \_\_\_\_\_

The undersigned of lawful age, being first duly sworn upon oath, deposes and states that I am the duly authorized agent of the bidder submitting the attached bid and am authorized by said Bidder to execute the within affidavit.

I further swear that if said Bidder is successful on this project, it will not discriminate against anyone in employment or employment practice because of race, color, religion, sex or national origin. The undersigned further states that said Bidder will comply with all federal and state laws and execute orders concerning the subject of nondiscrimination.

The undersigned further states that said Bidder does not and will not maintain or provide for its employees any segregated facilities as defined in the instructions to perform their services at any location under its control, where segregated facilities are maintained. The Bidder further agrees that a violation of this certification is a breach of the equal opportunity clause of this bid and any contract awarded pursuant thereto. Said Bidder further agrees that (except where it has obtained identical certification from proposed subcontractors for specific time periods), it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding Ten Thousand (\$10,000.00) which are not exempt from the provisions of the equal opportunity laws, and that said Bidder will retain such certifications in its files.

The undersigned further states that said Bidder has not been a party to any collusion among Bidders in restraint of freedom of competition by agreement to bid at a fixed price or to refrain from building; or with any state official or employees as to quantity, quality or price in discussions between Bidders and any state official concerning exchange of money or other thing of value for special consideration in the letting of a contract; and the Bidder/Contractor has not paid, given or donated or agreed to pay, give or donate to any officer or employee of the State of Oklahoma (or any other entity) any money or other thing of value, either directly or indirectly, in the procuring of the award of a contract pursuant to this bid.

The undersigned further states that any partnerships, joint ventures, or other business relationships that are now in effect, or existed within one (1) year prior to this statement, with the Architect, Engineer or other party to this project; or any such business relationships between any officer or director of the Bidder and any officer or director of the Architectural Engineering firm or other party to the project are described as follows:

## **TRADE CONTRACT ATTACHMENT “C”**

### **Safety Requirements & Site Policies**

1. Workers shall report unsafe conditions to their supervisors immediately. No worker shall be required or knowingly be permitted to work in an unsafe place, unless for the purpose of correcting the hazard and then only after all safety precautions have been implemented.
2. Safe work habits are mandatory. Report any unsafe conditions or performances to Construction Manager. Follow all Crossland safety rules and procedures. Crossland’s safety manual is posted in office.
3. Suitable clothing for construction shall be worn on the construction site at all times. Proper Leather Hard Soled Shoes, and appropriate safety equipment shall be worn at all times. Shirts with sleeves (at least t-shirt length) and full-length pants shall be required. Polyester or similar material is not allowed; shorts, tennis shoes, and tank tops also shall not be worn on site.
4. All employees on site shall wear hard hats that meet the requirements of ANSI Z89.1-1997 at all times outside the area designated as Trailer Row. Hard hats shall be worn in such a manner that the hat brim is positioned in front at all times. Hard hats may be worn backwards at the discretion of the Construction Manager. This includes all equipment operators, vehicle and truck drivers of contractors and material suppliers delivering to the site. Hard hats are required at all times on project. No exceptions. Hard hats will not be furnished by Crossland.
5. Protect and respect others work.
6. Lunch trash is to be deposited in trash cans. No exceptions.
7. Keep your work areas clean. Sweep areas at end of each day.
8. No urinating in or around buildings. Anyone caught doing so, will be removed from the project permanently.
9. Concealed weapons will not be allowed on site. Anyone having such will be permanently removed from project.
10. No removal of excess materials or scraps from project.
11. Posted speed limit shall be adhered to at all times: 10 mph on designated haul roads, 5 mph inside the building, on the building pad, trailer row, and other areas not designated at 10 mph. 20 mph may be permitted for site/civil work away from the pad areas and away from other trades at the discretion of the Construction Manager.
12. Seatbelts shall be worn at all times in vehicles including heavy equipment. All heavy equipment shall have rollover protection and seatbelts.
13. No one shall ride in a vehicle or mobile equipment unless they are on a seat. Exceptions: Scissor and boom lifts. Riding in the back of pick-up trucks shall not be allowed.
14. All heavy equipment including: cranes, forklifts, etc. shall have a reverse signal/back-up alarm audible above surrounding background noise.
15. No catering services shall be permitted on site.
16. Excavation work shall be performed in accordance with 29 CFR 1926 Subpart P.
  - ☐ Flagging and/or suitable warning devices will be required around all trench and excavation work at least three (3) feet (this distance can be exceeded if site specific required) from the edge of the excavation.
  - ☐ A safe means of access and egress shall be provided from excavations regardless

of their depth at intervals that provide no more than 25 feet of lateral travel.

☐ A competent person shall always be present while excavation work is performed.

17. Persons working on any aerial lift shall be tied off, at all times, to a platform tie-off point or a similar safety device securely attached to the structure of the lift.
18. In the building, all lifts shall be propane or electrically powered with non-marking tires. Gasoline or diesel-powered lifts shall not be used in the building. Any costs associated with cleanup of floors due to damages caused by lifts will be charged to the Trade Contractor. Any changes to this requirement, is at the discretion of the Construction Manager.
19. All propane tanks shall be stored in a tank farm; (including empty tanks).
20. A fire watch shall be stationed to provide coverage for each welding, cutting, and other hot work operations. A fire watch may cover multiple operations with a 100-foot radius of them. In order for a fire watch to cover multiple operations, they shall have a clear line of sight to each operation and an unobstructed pathway to each operation. Fire watches shall have no collateral duties.
21. Ladders shall reach three feet above the landing for safe access. All ladders shall be positioned on a stable surface and secured to prevent displacement. All ladders shall be fiberglass. Step ladders and extension ladders are not acceptable as stairs. Each contractor is responsible for providing stairs into the building for their employees. Damaged ladders shall be removed immediately from the jobsite.
22. All electrical power tools and/or equipment shall be plugged into a ground fault circuit protection (GFCI). At the source of electrical power. All frayed and/or damaged electrical cords shall be removed from service and repaired. Cords shall not be tied into knots.
23. Only UL-approved metal fuel cans with flame arresters and self-closing pour spouts shall be allowed on sight.  
Fuel cans shall not be stored inside the building, or inside trailers. Cans shall be brought inside the building only to fuel equipment, and, then must be removed immediately.
24. All chemical materials used shall have a Material Safety Data Sheet (MSDS) filed with Construction Manager and posted in an area where work is being performed.
25. Electrical Panels shall not be accessed by anyone. Only those authorized by Construction Manager shall have access to the electrical panels.
26. Flag, barricade, or sign areas to keep employees from exposures to potentially hazardous work conditions.
27. All underground electrical utilities shall be located prior to any excavation work occurring. The electrical contractor shall be notified to assist with this location. As-built drawings and electronic location shall be used to locate all underground electrical utilities. Contractors working around overhead electrical lines shall ensure that all equipment, materials, and personnel are at least 10 feet from the overhead lines.
28. As described in each Contractor's Safety Program work permits shall be utilized for those work activities that specifically require them. (Examples are confined space, electrical hot work, welding, painting, work where underground utilities are present, etc).
29. All employees shall OBEY all posted safety signs.
30. Clean up and housekeeping shall be top priority. This project shall be kept clean and orderly at all times. The work area SHALL be cleaned on a continuous basis; no debris or trash will be permitted. Dumpsters shall not be backed up to any location of the building. They shall be maintained at a minimum distance of 50 feet from the building.
31. Glass containers of any kind shall not be brought onto the construction site.
32. Each fuel storage tank brought onto the construction site shall be provided with its own secondary containment unit. The use of earthen dikes shall not be allowed. All fuel tanks shall be grounded

Norman Senior Center – Bid Package #3 – Site and Building

- in accordance with NFPA requirements.
33. Concrete trucks shall have all concrete chutes removed, with top chute in the raised and locked position while traveling on the jobsite.
  34. Storage required by the Contractor shall be in areas designated by the Owner. All materials on the construction site shall be stored/staged on dunnage.
  35. No one will be allowed to move a trailer or any other device for living on site.
  36. It is a policy of the Owner that no smoking will be permitted in the building once the roof and sidewalls are installed. The fine for smoking in the building shall be \$50 per infraction. All fines will be paid by the Contractor to the Owner's designated charity. All Contractor and Subcontractor employees shall abide by this policy.
  37. There will be no smoking/tobacco products, eating or drinking (with the exception of water) when the roof of the building is installed. There will also be no smoking/tobacco products, eating, or drinking (with the exception of water) on the finished floors. Smoking will be permitted in designated areas only.
  38. Confine vehicle parking and all vehicle deliveries to only those areas designated by the Construction Manager.
  39. No parking in the construction area. Designated parking areas only.
  40. Only company vehicles shall be allowed on the construction site; all others shall use the employee parking lot designated on the construction site.
  41. Permission shall be obtained from Construction Manager prior to taking any vehicle into the building.
  42. All employees shall conduct themselves in a worker like manner at all times. Any other personnel, horseplay or disruptive activities of any kind shall result in immediate dismissal/removal from the job site.

**I hereby attest by my signature that I have read and understand these Safety Requirements and Site Policies, and I will abide by them. I also understand that they may be jobsite specific amended or modified at any time at the discretion of Crossland Construction.**

## INSURANCE MINIMUM REQUIREMENTS

### EXHIBIT 9.2.2.1

#### Insurance Minimum Requirements

**The Subcontractor shall purchase and maintain insurance of the following types of coverage and limits of liability.**

- 1. Commercial General Liability (CGL)** with limits of insurance not less than \$1,000,000 each occurrence, \$1,000,000 Personal and Advertising Injury, \$2,000,000 General Aggregate, \$2,000,000 Products/Completed Operations Aggregate.
  - a. If the CGL coverage contains a General Aggregate Limit, such General Aggregate shall apply separately to each project.
  - b. CGL coverage shall be written on ISO Occurrence for CG 00 01 04 13 or a substitute form providing equivalent coverage and shall cover liability arising from premises, operations, independent contractors, products-completed operations, and personal advertising injury.
  - c. General Contractor, Owner and all other parties required of the General Contractor, shall be included as Additional Insureds. The endorsement shall include that any person or organization that Subcontractor is required to add as an Additional Insured under the Subcontract Documents shall be included as an Additional Insured (CG 20 38 04 13 or its equivalent). Coverage must include both ONGOING Operations and COMPLETED Operations (CG 20 10 04 13 and CG 20 37 04 13 or equivalent as permitted by law). Vicarious forms of additional insured endorsements will not be accepted. It shall apply as Primary and non-contributing Insurance before any other insurance or self-insurance, including any deductible maintained by or provided to the Additional Insured.
  - d. Subcontractor shall maintain CGL coverage for itself and all Additional Insureds for the duration of the project and maintain Completed Operations coverage for itself and each Additional Insured for at least 2 years after the completion of the Work.
  - e. Provide Stop Gap Coverage, if applicable, for the following states: North Dakota, Ohio, Washington, West Virginia or Wyoming.
  - f. Coverage shall include:
    1. Contractual liability coverage sufficient to meet the requirements of the Subcontract Documents (including defense costs and attorneys' fees assumed under the contract, which shall be payable in addition to the limit of liability).
    2. No separation of insured exclusion.
    3. The following exclusions are absolutely prohibited and shall not be included in Subcontractor's policy if applicable to the work.
    4. No damage to Work performed by Subcontractor exclusion (CG 22 94 or similar).
    5. No exclusion for subsidence, which is specifically prohibited for any work involving excavation, soil stabilization, earth retention, concrete, structural steel, landscaping, waterproofing, fire protection, and plumbing.
    6. No "residential" exclusion that would void or restrict coverage due to the nature of the Work.
    7. No EFIS exclusion. If Subcontractor's scope of work involves the building's exterior finish, there shall be no EFIS exclusion on the CGL policy unless the Subcontractor maintains a Pollution Liability policy that provides coverage for the resultant damage of the EFIS work.

**2. Automobile Liability**

- a. Business Auto Liability with limits of at least \$1,000,000 combined single limit.
- b. Business Auto coverage must include coverage for liability arising out of all owned, leased, hired and non-owned automobiles.
- c. General Contractor, Owner and all other parties required of the General Contractor, shall be included as Primary and Non-Contributory Additional Insureds on the auto policy.
- d. If hauling of hazardous waste is part of the Scope, Automobile Liability Insurance with a \$1,000,000 combined single limit per occurrence for bodily injury and property damage applicable to all hazardous waste hauling vehicles, and include MCS 90 endorsement and the ISO Form CA 9948 (Pollution Liability Broadened Coverage for Business Automobile).

**3. Commercial Umbrella**

- a. Commercial Umbrella/Excess Liability Insurance for bodily injury and property damage liability must sit over Subcontractor's primary Employers' Liability, Commercial General Liability and Commercial Automobile Liability.
- b. Umbrella limits must be at least \$1,000,000.
- c. All coverages and terms required under the Commercial General Liability, Automobile Liability and Employers' Liability must be included on the Excess/Umbrella Liability policy.
- d. Higher limits may be required by Contractor or Owner on a project-by-project basis.
- e. Umbrella coverage for such Additional Insureds shall apply as primary before any other insurance or self-insurance, including any deductible, maintained by, or provided to, the Additional Insured other than CGL, Auto Liability and Employers' Liability coverages maintained by the Subcontractor.

**4. Workers' Compensation and Employers' Liability**

- a. Workers' Compensation Insurance and Employers' Liability Insurance (including occupational disease) to cover statutory benefits and limits under the Workers' Compensation laws of any applicable jurisdiction in which the scope is to be performed.
- b. Employers' Liability Insurance limits of at least \$500,000 each accident,
  - i. \$500,000 each employee, and \$500,000 disease policy limit.
- c. Where applicable, U.S. Longshore and Harbor Workers Compensation Act Endorsement shall be attached to the policy.
- d. Where applicable, the Maritime Coverage Endorsement shall be attached to the policy.
- e. Maintain monopolistic coverage, if applicable, for the following states: North Dakota, Ohio, Washington, West Virginia or Wyoming.

**5. Builder's Risk**

- a. Upon written request of the Subcontractor, the Contractor shall provide the Subcontractor with a copy of the Builder's Risk policy of insurance or any other property or equipment insurance in force for the Project and procured by the Owner or Contractor.
- b. If the Owner or Contractor has not purchased Builder's Risk Insurance satisfactory to the Subcontractor, the Subcontractor may procure such insurance as will protect the interests of the Subcontractor, its subcontractors and their subcontractors in the Subcontract Work.
- c. If not covered under the Builder's Risk policy of insurance or any other property or equipment insurance required by the Subcontract documents, the Subcontractor shall procure and maintain at the Subcontractor's own

- d. expense, property and equipment insurance for the Subcontract Work including portions of the Subcontract Work stored off the site or in transit, when such portions of the subcontract Work are to be included in an application for payment under Article 8.

#### **6. Installation Floater**

- a. If required by Contractor or not covered by the Builders Risk Insurance, Subcontractor shall obtain an Installation Floater to cover that portion of the Work to be constructed, installed, altered or repaired by Subcontractor. Contractor, Owner or other parties, as required by the Subcontract Documents, shall be listed as loss payees.

#### **7. Professional Liability**

- a. Subcontractor and all sub-subcontractors and Designers providing Professional Services shall provide and maintain Professional Liability Insurance coverage. The policy coverage shall be effective (retroactively, if applicable) from the date of commencement of all professional activities in connection with the scope.
- b. Professional Services always include, but are not limited to: design, architecture, engineering, testing, surveying or design/build services, temporary engineering, engineered excavations and shoring systems, post-tension supply, structured steel, specialized millwork that is performance specified, roofing or waterproofing systems, curtainwall, mechanical fire protection systems, electrical, and fire alarm systems.
- c. Both Subcontractor and listed sub-subcontractors shall have proof of Professional Liability Insurance coverage in the amount of \$1,000,000 per claim with a maximum deductible of \$25,000 to be paid by Subcontractor.
- d. The Subcontractor shall, upon request of Contractor, furnish a copy of its Professional Liability policy. The Professional Liability policies shall be continued in effect for the applicable statute of repose for the state where the project is located.

#### **8. Pollution Liability**

- a. This Section is applicable to Subcontractor, and any sub-subcontractor of any tier that is providing work related to environmental services, building enclosure systems, plumbing, heating, ventilation, air conditioning, drywall, insulation, building foundations or any work which includes Microbial Matter, Mold, Fungi or Bacteria and any work which will involve the use of hazardous materials. Subcontractor and all applicable sub-subcontractors must provide and maintain a separate Pollution Liability Insurance policy including coverage for, but not limited to, claims arising out of all hazardous material and hazardous waste remediation, storage, transportation, clean-up and disposal. Pollution Liability policies must include contractual liability coverage aligned with indemnification obligation of the Subcontract Documents.
- b. The policy limits shall be in the amount of \$1,000,000 with maximum deductible of \$25,000 to be paid by the Subcontractor.
- c. Pollution Liability Insurance policy shall name Contractor and all other parties as required under the Subcontract Documents as Additional Insureds.
- d. The Subcontractor and sub-subcontractors shall maintain Pollution Liability coverage for a minimum of 2 years after the completion of the Work, or such longer period as required by the Subcontract Documents. Should mold coverage be required and provided by a claims-made form, such coverage shall be maintained annually for 2 years following completion, or such longer period as required by the Subcontract Documents.

## **9. Equipment Floater**

- a. Subcontractor shall maintain, at its sole cost and expense, insurance to protect its own equipment, tools and materials against risk of loss with sufficient limits to cover the value of all of the equipment, tools and materials Subcontractor may use in performance of the Subcontract Work.
- b. Subcontractor is solely responsible for any deductibles, self-insured retentions or uninsured losses for any reason arising out of Subcontractor's obligations in this Section. Coverage shall include equipment leased/borrowed/rented by Subcontractor.

### **Waiver of Subrogation**

Subcontractor waives all rights against the Contractor, Owner and Architect and their agents, officers, directors and employees for recovery of damages to the extent these damages are covered by Commercial General Liability, Commercial Umbrella Liability, Business Auto Liability, Builder's risk, or Workers' Compensation and Employers' Liability insurance maintained per requirement stated above and to the fullest extent allowed by law.

### **Number of Policies**

Commercial General Liability Insurance and other liability insurance may be arranged under a single policy for the full limits required or by a combination of underlying policies with the balance provided by an Excess or Umbrella Liability policy.

### **Cancellation, Renewal and Modification**

The Subcontractor shall maintain in effect, all insurance coverage required under this Agreement at the Subcontractor's sole expense and with insurance companies acceptable to the Contractor. To the extent commercially available, the policies shall contain a provision that coverage will not be cancelled or not renewed until at least thirty (30) days prior written notice has been given to the Contractor. If not commercially available, Subcontractor shall be responsible for providing Contractor with notice.

### **Continuation of Coverage**

Unless otherwise outlined herein, the Subcontractor shall continue to carry Completed Operations Liability Insurance for at least two (2) years after either ninety (90) days following Substantial completion of the Work, or final payment to the Contractor, whichever is earlier. The Subcontractor shall furnish the Contractor evidence of such insurance at final payment, and one year from final payment.

### **Special Provisions**

All policies shall be written through companies duly entered and authorized to transact that class of insurance in the state in which the project is located. The Insurance Companies must have an A.M. Best rating of A- or better in the most recent Best's Key Rating Guide.

Approval, disapproval or failure to act by the Contractor regarding any insurance supplied by the Subcontractor shall not relieve the Subcontractor of full responsibility or liability for damages and accidents. Neither shall the bankruptcy, insolvency or denial of liability by the insurance company exonerate the Subcontractor from liability.

Contractor shall make no special payments for any insurance that the Subcontractor may be required to carry; all are included in the contract price and in the contract unit prices.

The Subcontractor shall require all sub-subcontractors to procure and maintain all insurance as set forth in this contract.

**Requirements in the Prime Contract and other Contract Documents are also the responsibility of the Subcontractor and in addition to these requirements. It is the responsibility of the Subcontractor to know what is required of Subcontractor.**
